Lectoclasificadora LD 8000

The Lectodara 8000 bulk check scanner and sorter, with its modular, high performance design, is the choice for regional centers and remittance/ lockbox operations. Its scalability allows you to configure the device to meet your processing and sorting requirements. And, with a short payback, it is the preferred replacement for under-utilized readers/sorters.

- 500 document feeder — high capacity that is consistent and reliable
- Modular 3 pocket sorter — extendable to 22 to meet your sorting needs
- Intelligent code line based sorting — meets your application requirements
- In-line recognition of OCR and barcode — for remittance and lockbox
- Peak productivity of 12,000 items per hour — speeds throughput
- Fast front and rear check imaging — in one pass

The Lectodara 8000 offers a highly durable and feature-rich solution to meet your processing needs. With its modular and scalable design, it is configurable to replace readers/sorters at a fraction of the total cost of ownership.

FEATURES

STANDARD FEATURES
- Automatic document feeder — up to 500 document input feeder
- Double feed detection
- Software OCR-A, OCR-B, and barcode recognition (Code 39, 128, 2/5 and PDF417)
