"Tesla Sound, the new solar lamp that increases the lighting when it detect sound"

TESLA
SOUND

TESLA SOUND: Solar Lamp

The new solar lamp, TESLA SOUND, with an innovative and modern design, has a 5W lamp, and is activated and deactivated automatically when detect dark. One of the main features of TESLA SOUND is to detect a nearby sound passes bright illumination mode, increasing its lighting, acting deterrent mode at presence around the property or otherwise helping to bring more light when you really need to detect the presence of people nearby.

TESLA SOUND has a solar panel on top by which automatically recharges during the day. Its panel, is not visible from the ground so that the risk of theft, so the risk is reduced.

TESLA SOUND is designed for use in individual properties, outdoor parking, gardens, parks, etc. It has an extendable mast of up to three meters high, which can be adjusted to the desired height. Furthermore, TESLA SOUND has a USB 5V 1st input that can be used to recharge mobile devices.

"Extensible mast up to 3m"

"Ability to be placed on mast or wall"
