Slim Economy: No wasteful lighting

One of the qualities of Slim Economy is that its illumination is focused exclusively on the ground at an angle of 120° so that no energy is wasted upper zones. Slim Economy Streetlights illuminate only the areas that are really necessary, thanks to its light sensor that turn on and off with the sunset and sunrise. The motion sensor will increase automatically the lighting when it detects presence of a pedestrian or vehicle.

Security

Place your Slim Economy at the entrance or front of your business or home. If someone approaches your property will change their light output from the power saving mode to its maximum illumination to alert that somebody is near to your property.

Easy to install Do it by yourself
